

The Ivory Tower

Henry James is best known for a number of novels showing Americans encountering Europe and Europeans. His method of writing from a character's point of view allowed him to explore issues related to consciousness and perception and his style in later works has been compared to impressionist painting. His imaginative use of point of view, interior monologue and unreliable narrators brought a new depth to narrative fiction. The Ivory Tower is the book Henry James was working on when he passed and even uncompleted, it has incredible insights regarding the United States, a country James had left twenty years before, not to return until so close to death. If you have an interest in Henry James, you need to read this book, if only to understand the apotheosis of his life. The novel is a brooding story of Gilded Age America. It centers on the riches earned by a pair of dying millionaires and ex-partners, Abel Gaw and Frank Betterman, and their possibly corrupting effect on the people around them.
