

American Womans Home: Or, Principles of Domestic Science (World Cultural Heritage Library)

The American Womans Home, originally published in 1869, was one of the late nineteenth century's most important handbooks of domestic advice. The result of a collaboration by two of the era's most important writers, this book represents their attempt to direct women's acquisition and use of a dizzying variety of new household consumer goods available in the post-Civil War economic boom. It updates Catharine Beecher's influential *Treatise on Domestic Economy* (1841) and incorporates domestic writings by Harriet Beecher Stowe first published in *The Atlantic* in the 1860s. Today, the book can be likened to an anthology of household hints, with articles on cooking, decorating, housekeeping, child-rearing, hygiene, gardening, etiquette, and home amusements. The *American Womans Home*, almost a bible on domestic topics for Victorian women, illuminates women's roles a century and a half ago and can be used for comparison with modern theories on the role of women in the home and in society. Illustrated with the original engravings, this completely new edition offers a lively introduction by Nicole Tonkovich and notes linking the text to important historical, social, and cultural events of the late nineteenth century.
