

The Harvard Classics Vol. 11: Origin of Species, Darwin

Collectible. Limited publication. Vol 11 of Harvard Classics set printed by PF Collier & Son, NY. Original book by Charles Darwin with editing of historical information and study notes by Charles W. Eliot. b/w illustration from etching by Axel Haig. This is a copy of Darwins 6th 1872 edition. Introduction presents an excellent historical perspective based on emerging evolution concepts at the start of the 20th century. At that time Darwins theories of evolution were not widely accepted or taught. For modern day readers it will be interesting to compare these early scientific concepts with those of today. Readers will find much interest from both historical and scientific perspectives. Both the Glossary and Index at the end can also be very useful to those doing research. 551 pages.
