

The War of the Worlds, with Illustrations

Long since we have stared out into the skies of the night staring, towards the stars, and into the milky way long have we wondered, what lies in this endless, mysterious void, we call space. Some people say emptiness, and worlds as desolate, and empty of life, like our own deserts, others say beyond our earthly vision, there lays intelligence, and life forms more advanced than our own. Then there are people who say, one day, beings from another planet will one day arrive in our skies, and challenge all our earthly beliefs, perhaps today, or tomorrow or sometime in the future, and start the War of the Worlds. This visionary book, contains original illustrations.
