

## The Pilot: A Tale of the Sea (Writings of James Fenimore Cooper)

Having drawn on local knowledge and private information for *The Spy* and on his own boyhood experiences for *The Pioneers*, it was inevitable that Cooper would seek a way to convert yet another area of his special knowledge into art. His first choice of career had been the U.S. Navy, in which he served as a midshipman from 1808 to 1810. In 1823, Cooper began writing *The Pilot*, which he saw as a sea novel that seamen would appreciate for its fidelity and yet one that landmen could understand. Cooper's poetic power is reserved for the sea, which is no backdrop but a separate world with forces and laws of its own. The individuation of the ships, particularly the personification of the *Ariel*, contributes to the magic, but the exhilaration of the book comes from the triumph of human skill and intelligence over the uncertainties and downright hostilities of a world of waves, winds, and hidden reefs. The land offers neither a comparable challenge nor so heady a victory. -- from the Introduction.
