

Woman in Sacred History (Illustrated)

The notable characters among the women of Bible history present so attractive and variable a theme for pictorial representation, that they have been several times grouped in book form, both in Europe and America, within the past twenty years. The freshness of the present publication, therefore, consists not in the subject but in its mode of treatment. In seeking material to illustrate Mrs. Stowe's interesting sketches, two purposes have been kept in view: first, the securing of a series of pictures which, by a judicious selection among different schools and epochs of art, might give a more original and less conventional presentation of the characters than could be had were all the illustrations conceived by the same mind, or executed by the same hand; and, secondly, the choice of such pictorial subjects as were well adapted to reproduction in colors, so as to represent as perfectly as possible, by the rapidly maturing art of chromo-lithography, the real ideas of the painters. The guiding principles of selection have been aptness of design and a rich variety of effect.
